The California Public Utilities Commission (CPUC) will hold its annual *Safety En Banc* on October 19, 2016.

The CPUC's Safety Action Plan, which helps to fully integrate safety in all aspects of the CPUC's work, calls for an annual *Safety En Banc* that provides for an interactive discussion of utility safety. The 2016 *Safety En Banc* is devoted to a discussion of interconnected critical infrastructures, such as gas, electric, communications, transportation, and water. The *En Banc* will explore the manner in which critical infrastructures are interconnected, such that a disruption in one infrastructure may have cascading adverse effects in others. The *En Banc* will include a presentation on interconnected infrastructures, and small breakout sessions during which Commissioners and invited stakeholders will discuss different topics related to interconnected infrastructures.

Although a quorum of Commissioners and/or their staff may be in attendance, no official CPUC action will be taken at this event. With the exception of the breakout sessions, this *En Banc* will be available via webcast at:

This includes completing the Customer Information Service Request Demand Response Provider Form (CISR-DRP Form) in paper form or through a “Click-Through” process.

**Public Meeting Notice: 619 Area Code Local Jurisdiction and Public Meeting**

<b>October 5, 2016</b> 11 am	<b>Pine Valley Improvement Club</b> 28890 Old Highway 80 <b>Pine Valley, CA 91962</b>
---------------------------------	---

The 619 area code is expected to use up all available prefixes by March 2019. To ensure the availability of numbers in the 619 area code region, the California Public Utilities Commission (CPUC) has begun the process to consider the introduction of the 858 area code to the geography now served by the 619 area code. Adding the 858 area code to the 619 area code is known as a boundary-elimination overlay, which was proposed by the telecommunications service providers. The proposed boundary-elimination overlay, pending CPUC approval, will allow all customers to keep their current phone numbers, including their area code.

This meeting is being held in order to provide more information about the area code relief activities in the 619 area code region and to solicit comments from the public. The public is encouraged to voice their opinion by:

- 1) Attending the Local Jurisdiction and Public Meeting scheduled above in October 2016;
- 2) Calling the area code hotline at (866) 340-6147;
- 3) Submitting written comments to the CPUC Public Advisor's Office by postal mail to 320 W. 4th St., Suite 500, Los Angeles, CA 90013; or
- 4) Sending an email to [public.advisor@cpuc.ca.gov](mailto:public.advisor@cpuc.ca.gov).

It is the CPUC's policy to schedule hearings in locations that are accessible to everyone. If you require additional accessibility assistance, please contact the CPUC Public Advisor's Office five business days prior to the meeting date toll free at 866-849-8390 or toll free TTY at 866-836-7825.

More information on the 619 area code is available at <http://www.cpuc.ca.gov/619areacode/>.

On January 28, 2016, the California Public Utilities Commission (Commission) adopted a successor tariff to the current net energy metering (NEM) tariff in Decision 16-01-044. That decision directed Energy Division staff, in collaboration with R.14-07-002 parties, to undertake further consideration of consumer protection measures, including the development of an information packet for customers interested in taking service under the NEM successor tariff. As a first step in the Commission’s further consideration of these issues, the purpose of this workshop will be to identify:

1. Consumer protection issues NEM customers have encountered; and
2. Existing regulation and jurisdiction over consumer protection for NEM customers.

The workshop agenda and presentation slides will be provided in advance of the workshop. For further information, please contact Shannon O’Rourke ([sr6@cpuc.ca.gov](mailto:sr6@cpuc.ca.gov) / 415.703.5574).

Grid-optimized distributed energy resources (DERs) participate in the management and provision of water and energy services to the ratepayers of the State of California. DERs as defined by AB 327 include energy efficiency, demand response, electric vehicles, electric storage, and solar generation and other renewable generation facilities. In compliance with electric utility and CAISO interconnection tariffs, DERs require communications for DER facility management and optimization. DERs have the potential to help manage scarce water resources which require intensive energy inputs to pump, treat, heat and move water in residential, commercial, industrial and agricultural applications across the state. DERs in water applications,

and the water facilities themselves, require telemetry and communications for optimized management and use.

Just as devices designed for the “Internet of Things” are less functional things without the internet, communications enable new possibilities for water and energy management, operation, and analysis. DERs, aggregators, and energy generation facilities need communications to interconnect to the grid and provide a greater range of grid services. Communications gaps in urban, suburban and rural areas complicate and add expense and delays to the process of negotiating and getting connected. Individualized communications agreements may be time consuming and expensive, yet the only alternative. This workshop will explore communications gaps, barriers, opportunities, and potential solutions to connect innovative DER and energy projects critical to California's greener future. For questions regarding the workshop, please contact Jamie Ormond at [Jamie.Ormond@cpuc.ca.gov](mailto:Jamie.Ormond@cpuc.ca.gov) or 415-703-1193.

**AGENDA**

Commission Decision 16-06-008 (“the Decision”) resolves issues related to customer authorization for the utility to share data with third party Demand Response providers. This includes completing the Customer Information Service Request Demand Response Provider Form (CISR-DRP Form) in paper form or through a “Click-Through” process.

The Decision requires the utilities to hold working group meetings with stakeholders and Energy Division to “develop a consensus proposal to streamline and simplify the direct participation enrollment process, including adding more automation, mitigating enrollment fatigue, and resolving any remaining electronic signature issues.” (See Ordering Paragraph 9, D.16-06-008).
